

**The Dental Bearing
Company**

Market position

Supplier of choice

For decades myonic has been the first choice supplier for almost all well-known dental equipment manufacturers. OEM's all over the globe trust in the successful collaboration.

Application and Engineering know-how

Born as a dental bearing supplier, myonic has always sought to understand and further develop the most demanding applications. Only with that approach have ongoing improvements been possible.

Partnership

Trust, openness and striving for joint success have always been our most important values. We differentiate ourselves by being a partner, not just a supplier.

Manufacturing

As part of MinebeaMitsumi group, myonic brings its background as a leading dental bearing manufacturer to the table. We (myonic) have the customer relationships, engineering experience and established designs which has come from years as the market's leading dental bearing manufacturer. As the world's largest bearing manufacturer, MinebeaMitsumi has the industrial capacity and resources which it can leverage in combination with myonic's dental standards to provide large volumes of high quality product at competitive prices.

Development

Customized requirements

Every dental application has its own challenges. myonic is specialized in providing solutions for all unique environments.

Broad product spectrum

Within the MinebeaMitsumi group, myonic is a specialist for customized bearings with low lead times in various production sizes. At the same time, myonic has access to the resources of MinebeaMitsumi for solutions to all rotational applications.

Turbine assemblies

Not only is myonic the no. 1 supplier for dental bearings, but we have added a further capability to our portfolio; we can now produce balanced turbine assemblies using in house manufactured spindles.

Foundational development

At first glance, dental bearings have not changed a lot over the years. myonic is constantly testing materials and lubrication to drive research based improvements in bearing fundamentals.

Service

Technical competence

Our sales team has a deep foundational and technical knowledge in bearing technology and manufacturing. This adds a great deal of value to any customer meeting and helps new project kickoffs gain a running start.

Key account structure

myonic prefers to connect with our business partners on multiple levels. Our customers can co-ordinate with our engineering teams, logistics and quality departments as much as they feel is necessary.

Logistics and quality

myonic offers customized logistic methods to serve the unique needs of our customers. Quality control measures can also be customized by agreement when you have special regulatory or certification requirements for your end product.

Investigation and consulting

If our customers face a situation where they need technical assistance, myonic stands ready to help investigate the root cause. With our long established history in the dental world, we are not only a product manufacturer, but a technical solution provider as well.

Testlab

One of myonic's most important success factors is a well-equipped testlab. It's widely recognized automated lifetime testing systems, state of the art analysis tools and expert personnel who interpret the findings are without equal.

- 1 Lifetime of air turbines on test benches
- 2 Solid-borne sound with laser vibrometer
- 3 Autoclaving
- 4 Close-up test bench

www.myonic.com

Japan's **MinebeaMitsumi Inc.** is a global market leader in the manufacture of miniature ball bearings and high-precision components for the telecommunications and aerospace sectors, as well as for the automobile and electrical industries.

myonic is an independently operating company within the group, but also profits from the good transnational collaboration inside both the group and the business unit, an amalgamation with three other MinebeaMitsumi companies. These synergy effects enable us to provide our clients with extraordinary combinations of customized technical and methodological solutions, not to mention volume production.
